PROJECTS

FRONTEND PROJECTS

1. I have Designed Many landing web pages like Music-Player ,Nova speaker,Cuckoon using **(HTML,CSS)**

2. I have also Developed Many Websites Clone Netflix,Web3-Design-Agency using **(HTML,CSS)**

3 . In my Frontend Journey I have also Crafted **Klindworth (Roofing & Repairs)** website landing page which was awarded on awwward.com, In this website i have used some basic concepts of **(HTML, CSS, JAVASCRIPT, GSAP ,SCROLLTRIGGER)**

BACKEND PROJECTS

1.File Generator (Mini project)

Developed a file management application implementing CRUD operations (Create, Read, Update, Delete) using **Node.js FS (File System) modules**. This project demonstrates proficiency in server-side scripting and file handling, essential for back-end development tasks.

2.Book Store (Mini project)

Developed an online bookstore application implementing CRUD operations (Create, Read, Update, Delete) using **Node.js, Express.js, and MongoDB**. Designed and created database schemas to store book details efficiently. This project showcases strong skills in full-stack development and database management.

3.BLOG.io

Developed a blogging website enabling user registration, login, and logout functionalities. Implemented blog creation with reference schemas, image handling with **ImageKit**, and user authentication with **Passport.js**. Utilized **Express.js, Node.js, and MongoDB** for the back-end infrastructure and **Tailwind CSS** for Styling , showcasing expertise in full-stack web development and authentication systems.

4.SOCIAL (Ongoing project)

Developed a social media website with user registration, login, and logout functionalities. Implemented post creation with reference schemas, image handling using **ImageKit**, and user authentication with **Passport.js**. Utilized **Express.js, Node.js, and MongoDB** for the back-end. Integrated **Socket.io** for real-time chat functionality and **Razorpay** as a payment gateway. Currently enhancing and expanding the project's features.
